# Treatment

As soon as I put a tick borne disease on the diagnostic table, I decided not to wait to take right action beginning with action that could only help not harm.  Nutrition, supplement, herbs.  When I integrated colloidal silver, I felt a shift back towards the land of light.  In reading other people's stories, I figured, by the time I got a diagnosis, if I ever got a diagnosis, I would be even sicker, and good nutrition would help.

Additionally - I did have a short run of anti-biotic, after which, some symptoms seemed to improve after the horrible reaction to the anti-biotic was over.

INFECTIOUS DISEASE DR.'s treat lyme this way...
